

## Integrate Rapid API

PROJECT TITLE	NEWS TRACKER APPLICATION
TEAM ID	PNT2022TMID33380

```
const axios = require("axios");
```

```
const options = {  
  method: 'GET',  
  url: 'https://myallies-breaking-news-v1.p.rapidapi.com/GetCompanyDetailsBySymbol',  
  params: {symbol: 'twtr'},  
  headers: {  
    'X-RapidAPI-Key': 'SIGN-UP-FOR-KEY',  
    'X-RapidAPI-Host': 'myallies-breaking-news-v1.p.rapidapi.com'  
  }  
};
```

```
axios.request(options).then(function (response) {  
  console.log(response.data);  
}).catch(function (error) {  
  console.error(error);  
});
```

The screenshot displays the RapidAPI interface for the 'Breaking News' API. The top navigation bar includes links for 'Create Team', 'Add Your API', 'Docs', 'Log In', and 'Sign Up'. The API details section shows 'Breaking News' by 'MyAllies', updated a year ago, with a popularity of 0.4/10, latency of 32ms, and a 0% service level. The 'Endpoints' tab is active, listing three endpoints: '/GetCompanyDetailsBySymbol', 'Company News', and 'Real-time News Feed'. The first endpoint is selected, showing its description 'Gets company's quote details' and a 'Test Endpoint' button. Below this, the 'RapidAPI App' is set to 'default-application\_6861092' and the 'Request URL' is 'rapidapi.com'. The 'Code Snippets' tab is also visible, showing a JavaScript code snippet for using the API with Axios.
