

PROBLEM STATEMENT

The problem statement aims at displaying the news virtually in an app format where several news have been scheduled in queue for the user to read efficiently without leaving any important news of his/her choice.

Who can use this app?	Above 13 aged users.
Why it is important to use?	Time and Cost Efficient.
What are the benefits?	Without searching the specific news , the user can follow the news of his/her choice which keeps the user updated while scrolling through the news tracker app.
How is it better than the other app?	Accessible by everyone and it is accurate than the other apps.
When to use?	Important times , Free time , reliability of the user.
